HARRISBURG
UNIVERSITY
OF SCIENCE AND TECHNOLOGY

We are glad to welcome you back to HU!

As we return to in-person events at HU, we understand you may have concerns about safety, as well as the changes to HU policies and procedures that we have implemented. We want every individual to be assured we are taking your concerns and the well-being of event attendees seriously.

Attendance at any HU event is at the sole discretion of the individual. Although HU has taken several recommended steps to combat the transmission of COVID-19, it does not guarantee or represent that transmission will not occur or that an attending individual will not be exposed. It is up to each individual to assess whether attending any in-person meeting or event is in their best medical interest.

What we are doing:

- All event attendees will perform a daily health assessment prior to arriving to HU campus to screen for COVID-19 symptoms and possible exposure.
- HU will continue to follow CDC and state/local guidelines regarding wearing a mask. Effective 8/16/2021, all individuals will be required to wear a mask while inside HU buildings, regardless of vaccination status.
- Common areas and frequently touched surfaces are being cleaned daily.
- Hand sanitizer is provided throughout the buildings.
- Posters are displayed with reminders on how to prevent the spread of germs.
- Meeting rooms, break rooms and other communal work areas have reduced seating and capacity limits.

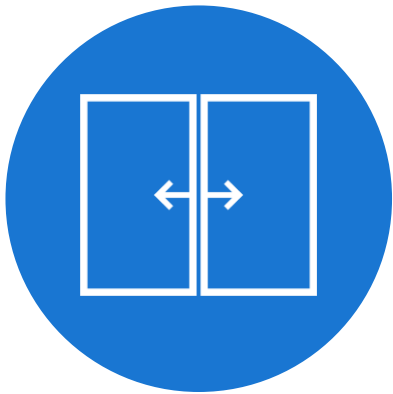

What you can do:

- Stay home or go home if you are sick.
- Maintain social distancing practices.
- Wash your hands frequently or use hand sanitizer.
- Cover your nose and mouth when sneezing or coughing.
- Avoid touching your face.
- Wear a face covering.
- Replace handshakes with head nods and waves.

Changes You May See at Events

HU has implemented new technology to keep our buildings safe going forward. Some of the new technology you may experience at any of our facilities include:

Automatic doors

Air cleaners and HVAC filters to reduce airborne contaminants

Motion-sensor toilets, faucets, soap and paper towel dispensers

Body temperature scanning devices

Virtual Help Desk Kiosks
